

Your National Partner for Mission-Critical Data Center Projects

We are a national heavy civil and industrial contractor, offering turnkey self-performing capabilities to execute the largest and most complex industrial projects. Our resources are equipped to meet fast-track schedules for mission-critical data center facilities.

Mass Earthwork & Grading

Projects <500,000 cy to >1M cy, with precision grading controls for tolerances within 0.25 inch.

Ground Improvement & Stabilization

Lime and cement stabilization, wick drains, as well as other approaches like dynamic compaction.

Utilities & Drainage

Domestic water, sanitary sewer, storm drainage, and duct bank construction.

Dewatering & Soil Management

Experience in coastal and high groundwater environments.

Large Industrial Pads

Refineries, LNG terminals, and tank farms—pads comparable in scale to data center campuses.

Deep Foundations

Turnkey solutions from drilled shafts to displacement, augercast, driven and micro piles.

Mission-Critical Readiness from the Ground Up

With extensive experience in energy infrastructure projects, we are fully prepared for mission-critical assignments. We possess the expertise and resources necessary for fast-track data center readiness. Our fleet of equipment, personnel, and supply chains is strategically positioned across North America, enabling us to mobilize quickly and scale according to project demands. We approach every project with a partnership mindset, remaining flexible while engaging and collaborating with all project stakeholders to provide critical solutions where they are needed. More than just site preparation, we deliver complete turnkey solutions by developing fail-safe execution strategies and sequencing before the first dozer begins operations.

Forgen for Data Centers

Safety First EMR <0.80, TRIR 0.00 and industry-leading Incident and Injury Free safety culture

Financial Strength Significant bonding capacity for mission-critical scale

Schedule Discipline Proven track record of hitting critical path on industrial facilities where delay leads to lost revenue

Quality Assurance Robust testing, third-party labs, and geotechnical coordination

First-Mover Advantage Offering Early Contractor Involvement and preconstruction services.
